

# Solar Powered Surveillance

A complete and reliable Solar Surveillance system is now available using the latest in camera and technology by offering IP PTZ Cameras, fixed and thermal IP cameras with up to HDTV quality video where required as well as onboard storage and more.

With the latest in camera and POE (power over ethernet) technology we are able to build reliable systems people have been looking for.

We can supply a complete kit solution from straight poles to tilt pole for quick installation to a mobile rugged solution.

Customisable for project specific needs with options such as WLAN/HSUPA (3G) to meet project specific needs to achieve wireless transfer of recordings as well as real time monitoring and alarms.

## Applications

- Mines and Quarries
- Councils
- Ports and Borders
- Government agencies
- Construction sites
- Roads and Traffic

## Key Features

- Green Energy
- PTZ solution
- Fixed camera solution
- Thermal camera solution
- Customisable to project needs
