

# Solar Powered Surveillance

A complete and reliable Solar Surveillance system is now available using the latest in camera and solar technology by offering IP PTZ cameras - fixed and thermal IP cameras with up to HDTV quality video where required as well as onboard storage and more.

With the latest in camera and POE (power over ethernet) technology we are able to build reliable systems people have been looking for.

We supply a complete kit solution from straight poles to tilt poles. You can use footings or concrete blocks for mobility. The system has been designed for quick installation.

Customisable for project specific needs with options such as WLAN or HSUPA (3G) to achieve wireless transfer of recordings as well as real time monitoring and alarms.

## Key Features

- Green energy
- PTZ solution
- Fixed camera solution
- Thermal camera solution
- Customisable to project needs
- Up to megapixel/HDTV resolution
- Fixed or tilt poles
- WLAN / 3G
- Event and failure alarms
- Easy installation

## Applications

- Mines and quarries
- Councils
- Ports and borders
- Government agencies
- Construction sites
- Roads and traffic
