

Transport Surveillance Solutions

A complete, compact and reliable Transport Surveillance system is now available using the latest in camera and storage technology by offering megapixel IP Cameras and network video recorder by Axis Communications.

The Network video recorder not only records the footage but also powers the low profile and compact Megapixel cameras via its lan cable offering up to 8 cameras.

The system will allow every thing you have wanted from mobile camera system using Solid State Drives. The system is the most robust system available — customisable for project specific needs with options such as WLAN/HSUPA (3G) 3rd party software to meet project specific needs to achieve wireless transfer of recordings as well as real time monitoring and alarms.

Applications

- Buses & Trams
- Armored Vehicles
- Police Vehicles
- Fire Brigade Vehicles
- Military Vehicles
- Air Craft

Key Features

- Single cable installation
- Rugged design
- Up to 8 cameras
- Customisable to project needs
- Megapixel resolution
- Live monitoring
- Event and failure alarms
- Flat non-invasive design
- IP66 cameras available.
